

Senior Project Manager - Product Development (f/m /div)*

Job description

You are an experienced project manager striving to work in an international environment? You are eager to drive the development of 3D image sensor products with professional project management methods? With your Project Management experience, you have the chance to do exactly that.

As a **Project Manager for 3D Image Sensor Products** you will work with premium **OEMs** in **mobile and automotive industry** to bring **new and exciting applications** to billions of people. Together with an **international team** of highly motivated and talented people you are developing innovative sensor enabling widespread adaption of disruptive applications such as secure face recognition and augmented or virtual reality.

In this job the main duties and responsibilities include:

- **Plan, organize and control the project** with full responsibility for all operational decisions in the project and for the successful achievement of all project targets
- **Manage and control the entire project life-cycle** and ensure hand-over to sustaining functions as main contact for all questions regarding the project
- **Form and lead the project team and assign responsibilities** within the project to project managers of sub-projects and project members
- **Manage a diverse project team** with sub-projects and assign tasks and work packages to the most appropriate individuals
- **Structure projects**, ensure compliance and hold project team accountable
- **Integrate and balance** skills and development areas of team members when creating teams
- Continuously **focus on project quality**, assess progress and ensure that goals are met even in the face of challenges

This position is part of the **Project Management career path**. It provides attractive career opportunities for employees who focus on managing projects and functional leadership of project team members.

During an individual training phase we will support preparing you for your new tasks. With regular feedback discussions and planning of your professional and personal development we want to ensure your success in this position.

This position is suitable for full time and part time.

Profile

You are best equipped for this task if you have:

- A university degree in **Electrical Engineering, Microelectronics** or comparable
- 6+ years proven **experience within the semiconductor industry**
