

Senior Project Manager RF Communications (f/m /div)*

Job description

As Senior Project Manager you will plan, manage and control development projects of products within our Power & Sensor Systems Division. More precisely, you will work on the development of RF power modules. In doing so, you will provide technical solutions for 5G wireless infrastructure applications. Our project management career path provides you with an attractive career opportunity with focus on managing projects and functional leadership of project team members.

In your new job you will:

- **Plan, organize and control the project with full responsibility** for all operational decisions in the project and for the successful achievement of all project targets
- **Manage and control the entire project life-cycle** and ensure hand-over to sustaining function as main contact person for all questions regarding the project
- **Form, guide and motivate cross functional project teams** across various Infineon sites
- **Maintain the overview and understanding of technical interdependencies** in order to proactively identify the most complex problems
- **Conduct a forward-looking risk management** by working closely with your stakeholders to identify possible mitigation measures and/or backup scenarios
- **Assume full responsibility for your projects** by continuously assessing the progress and adjusting the project plan to ensure that goals are met even in the face of challenges; this also involves anticipating and proactively managing significant changes to the existing project agreement

Profile

You like to collaborate with multiple stakeholders and are able to communicate clearly and in a direct manner when sharing and simplifying complex information. Working with responsibility and connected freedom in decision making processes is a spur to you. You recognize new opportunities and cooperate across boundaries to pursue them effectively. At the same time you remain aware of the big picture.

You are best equipped for this task if you have:

- A **degree in Electrical Engineering**, Microelectronics or related field
- At least **8 years of working experience** in the semiconductor industry, thereof at least **6 years of project management experience**
- Experience in semiconductor industry including **wafer production and packaging know how**
- **Experience in RF power communication** as a plus
- A **project management certification** as a strong plus, ideally IPMA Level C
