Figure 5: Editing the profile
Step 2: Registration for a certification date

Select "Certifications" in the menu selection field of the pma Self Service Tool and then click on the button "Register for a certification date".

Please select the certification level first. Then please make the decision regarding the type of certification date. Open (still available) dates are displayed in the form of the following drop-down menu Certification Date.
**Closed dates** for companies, universities, technical colleges and schools are not automatically displayed. To do this, select the option "Closed date" under "Type of certification date". You will then be asked to enter the desired certification date manually. Then enter your company/organisation, technical college, university, school... in the Organization field.

### Step 3: Enter your core data

In the 3rd step, you must enter your **personal core data** such as name, address, date of birth, optional company data, etc.. Some of this information is already filled out in the form, as you have provided it during your registration or in your profile. Please complete the missing data.

In the "**Type of ID document**" field, for example, a passport, driving licence or identity card number must be entered.
Step 4: Invoice

In the 4th step, students who participate in a university, university or school-internal date must confirm "Participation in a school, university or FH-internal certification date" with "Yes". A current confirmation of enrolment must be uploaded (exception: pupils*)!

If the invoice is not paid by you as a private person, confirm with "Yes" "Company pays certification". The fields to be filled in for this purpose will appear automatically. Please fill in the company details in detail and completely so that the certification fee can be paid. If the company is a pma member, "Company has a pma membership" must be confirmed with "Yes".

The corresponding billing address can be filled automatically by selecting "Copy private address" or "Copy company address". If neither the private address nor the company address is the valid billing address, this would have to be entered manually.
Step 5: Certificate

The 5th step is to select the language in which the certification will be carried out "Language of certification" and the language in which the certificate will be issued "Certificate issued in". The corresponding delivery address can be filled automatically by selecting "Copy private address" or "Copy company address". If neither the private address nor the company address is the valid delivery address for the certificate, this would have to be entered manually.
Step 6: education, higher education, additional education

In the 6th step, the information concerning your completed education, higher education, and additional education must be provided.
Step 7: Education and training, professional career path

2.3 Self – assessment

Step 8: Evaluation of your knowledge regarding the PM competence elements

General information on self-assessment of PM competences:
The PM competences are divided into three competence areas:

- Perspective competences
- People competences
- Practice competences

For better orientation and easier assessment of the PM competences, the corresponding competence indicators of the respective competence elements are shown. (see Figure 15: Self assessment - using the competence element "personal communication" as an example).

The following self-assessment is to be carried out conscientiously and truthfully. It therefore requires some time.

The self-assessment of your PM competences is to be carried out using the ICB4 six-stage taxonomy (see page 2), whereby stage 6 represents the absolute maximum. To be able to carry out the corresponding self-assessment it is necessary to familiarise yourself with the description of the corresponding competence elements in the ICB4. Your own competences should be assessed based on these descriptions.

Explanation of the taxonomy

- **Stage 1 Knowledge:**
  Recollection of basic concepts (theories, specific details, terminological knowledge, individual facts), recollection of patterns, processes, methods, categories, criteria, awareness of suitable material, minimum reorganisation

- **Stage 2 Comprehension:**
  Simplest level of understanding, recognising simple connections, showing awareness of what is being discussed, using material (without relating it to other materials, or recognising its broadest sense), translating, using one’s own words, interpreting, extrapolating, recognising what has been learned in another context

- **Stage 3 Application:**
  Use and implementation of unidimensional learning content in a new and specific situation, use of project management methods

- **Stage 4 Analysis:**
  Examine and break more complex information into fundamental elements and parts, identification of elements, clarification of organisational principles and (explicit and implicit) structures or hierarchies, recognition of connections, explanation of relationships between the elements, making diagnoses and case studies. This is a question of breaking down the whole (=project) into its parts (plans in the project handbook), in particular observing relationships and effects (interactions) between the individual elements

- **Stage 5 Synthesis:**
  Putting together elements and parts to form a whole, developing, producing a new structure or plan, interweaving experiences, developing hypotheses, networking, optimising the weighing up of pros and cons using an interdisciplinary approach, uniting two or more elements to form a new unit. Compile information
together in a different way by combining elements in a new pattern or proposing alternative solutions, by using the optimized project management methods in highly complex situations. Taking into account personal experiences and using methods from other areas.

- **Stage 6 Evaluation:**
Assessing, evaluating, judging a solution, a model, a procedure in terms of its usefulness, functionality, coherence and quality, discovering logical errors and defending opinions. Reviewing projects and guiding others in the area of project management in order to optimise the project management approach. Other project managers can be coached.

In the online registration form, please tick the box indicating your assessment of the respective competence element! **Only your highest rating per competence element is to be marked.**
