### 2.2 Self - assessment

**General information on self-assessment of PM competences:**

The PM competences are divided into three competence areas:

- Perspective competences
- People competences
- Practice competences

For better orientation and easier assessment of the PM competences, the corresponding competence indicators of the respective competence elements are shown. (see Figure 4: Self assessment - using the competence element "personal communication" as an example).
The following self-assessment is to be carried out conscientiously and truthfully. It therefore requires some time.

The self-assessment of your PM competences is to be carried out using the ICB4 six-stage taxonomy (see page 2), whereby stage 6 represents the absolute maximum. To be able to carry out the corresponding self-assessment it is necessary to familiarise yourself with the description of the corresponding competence elements in the ICB4. Your own competences should be assessed based on these descriptions.

Explanation of the taxonomy

• **Stage 1 Knowledge:**
  Recollection of basic concepts (theories, specific details, terminological knowledge, individual facts), recollection of patterns, processes, methods, categories, criteria, awareness of suitable material, minimum reorganisation

• **Stage 2 Comprehension:**
  Simplest level of understanding, recognising simple connections, showing awareness of what is being discussed, using material (without relating it to other materials, or recognising its broadest sense), translating, using one’s own words, interpreting, extrapolating, recognising what has been learned in another context

• **Stage 3 Application:**
  Use and implementation of unidimensional learning content in a new and specific situation, use of project management methods

• **Stage 4 Analysis:**
  Examine and break more complex information into fundamental elements and parts, identification of elements, clarification of organisational principles and (explicit and implicit) structures or hierarchies, recognition of connections, explanation of relationships between the elements, making diagnoses and case studies. This is a question of breaking down the whole (=project) into its parts (plans in the project handbook), in particular observing relationships and effects (interactions) between the individual elements

• **Stage 5 Synthesis:**
  Putting together elements and parts to form a whole, developing, producing a new structure or plan, interweaving experiences, developing hypotheses, networking, optimising the weighing up of pros and cons using an interdisciplinary approach, uniting two or more elements to form a new unit. Compile information together in a different way by combining elements in a new pattern or proposing alternative solutions, by using the optimized project management methods in highly complex situations. Taking into account personal experiences and using methods from other areas

• **Stage 6 Evaluation:**
  Assessing, evaluating, judging a solution, a model, a procedure in terms of its usefulness, functionality, coherence and quality, discovering logical errors and defending opinions. Reviewing projects and guiding others in the area of project management in order to optimise the project management approach. Other project managers can be coached
In the online registration form, please tick the box indicating your assessment of the respective competence element! **Only your highest rating per competence element is to be marked.**

- at least 900 PT as project manager and thereof
- at least 540 PT activity as overall responsible project manager of complex projects, can be counted:
Below are listed 3 examples with project details including your person days (PT) according to your project role(s):

Example 1: Project manager with 280 person days (PT) project management in a recently completed complex project selected for the report.

<table>

Please select for the report the most recently completed complex project for which you were responsible as a project manager throughout. The project must have already been completed upon application. There may have been no change of roles during the project as all of the PM's sub-processes related to the certification will be dealt with and assessed.

<tbody>
<tr>
<td>PTM (with leadership of a sub team):</td>

</tr>
</tbody>
</table>

For this complex project, a Complexity Sheet and an Executive Summary Report (ESR) must be completed below.
Example 2: Project manager with 170 person days (PT) project management and 50 person days (PT) as project team member with leadership of a sub team in a complex project.

Total outlay in person days (PD)*: 1700

For the entire project (incl. individuals involved in the project in PD)

Actual outlay in candidate person days (PD):

PM: 170  
PTM (with leadership of a sub team): 50

For this complex project, a Complexity Sheet and an Executive Summary Report (ESR) must be completed below.

Example 3: Project manager with 150 person days (PT) project management and 90 person days (PT) as project team member with leadership of a subteam in a non-complex project.

Total outlay in person days (PD)*: 1500

**Step 2:** For all complex projects (including the project that you select for the report) with which the at least 540 person days (PT) are achieved as the overall responsible project manager complex projects, Complexity Sheets must be filled in below and the complexity value of at least 25 must be fulfilled in each case (see example 1 and example 2 above).

The following is an example of Example 1 - with a requirement to perform a complexity assessment using a Complexity Sheet - illustrated below:

The evaluation of the complexity of the project takes place according to 10 parameters in a respective 4-level scale (4 very high complexity ...to 1 very low complexity).
Step 3: For all complex projects (including the project that you select for the report), with which the minimum of 540 person days (PT) are achieved as the overall responsible project manager of complex projects, Executive Summary Reports are to be created below.

The aim of the Executive Summary Report (ESR) is to provide the assessors with detailed information on the complex projects they have managed as project managers.

The following is an example of Example 1 - a complex project with a degree of complexity of 26 - and the requirement to prepare an Executive Summary Report (ESR):

**Project Nr.: testproject 1**

Please note the following warnings for this project:
